

FENIX®

INNOVATIVE MATERIALS  
FOR INTERIOR DESIGN

## FEATURES

When viewed under a microscope, you can see that the structure of FENIX is like a landscape with uneven peaks and valleys. When light waves hit the surface, the angle of incidence is not the same everywhere. Therefore, light reflects in different directions. This is what makes FENIX matt.

### Low light reflectivity, extremely matt surface

Bassa riflessione della luce, superficie estremamente opaca  
Faible réflectivité de la lumière, surface extrêmement mate  
Baja reflectividad de la luz, superficie extremadamente mate  
Geringe Lichtreflexion, extrem matte Oberfläche  
Lage lichtreflectie, uiterst mat oppervlak

### Soft touch

Morbidezza al tatto  
Morbidezza al tatto  
Toucher soyeux
