Assembly instruction

Fazett

1. Each Fazett is supplied with a wooden plate covered with velcro on one side.

2. Mount the wooden plate on the wall where you want to place the absorbent. Then simply place the Fazett against the velcro, and you're done!

Tip!

Start with one Fazett in either the top / bottom
OR left/ right positions.

Mount the velcro plate onto the wall. Make sure it is
positioned correctly.

Mount the Fazett on the velcro plate, and make sure it is level.

Mount next velcro plate onto the wall, and place a
Fazett on it in the exact position.

Continue to the next in the pattern, and so on.
